Web application programming using Java Servlet and JSP (code: JSP)

Overview

The course includes two main parts of Java EE standard used for web application programming: Java Servlets and JavaServer Pages (JSP).

The course also includes know-how about designing web applications.

Duration

2 days

Agenda

Day 1

1. Introduction to web application development
2. Java Servlets, session, multi-thread environment
3. JavaServer Pages (JSP), using JavaBeans

Day 2

1. Observer pattern, Listener, Filters
2. Web application security
3. JSP Expression Language (JSP EL)
4. Most important libraries

Target audience and prerequisites

Before attending this course, students must have:

— Basic Java programming skills
— Basic experience in designing and programming web applications
— Basic knowledge about object-oriented programming (classes, objects, methods, attributes)
— Basic knowledge about HTML language

We recommend students to complete the course 'Introduction to Java 5.0 Language'

Certificates

Course participants receive completion certificates signed by ALX.

Locations

— Warsaw (English) – Jasna 14/16A
— Online (English) – your home, office or wherever you want
— any other location (London, UK, EU) on request

Price

740 EUR

The price includes:

— course materials,
— snacks, coffee, tea and soft drinks,

— course completion certificate,
— one-time consultation with the instructor after course completion.
